About Me:

Mobile Developer with strong expertise in Android and iOS application development. Proficient in Kotlin, SwiftUI, Jetpack Compose, and Firebase, with hands-on experience delivering full-cycle mobile projects from idea to production. Skilled in building clean and scalable architectures (MVVM, Clean Architecture), integrating payment systems, maps, and push notifications, as well as managing publishing pipelines on Google Play. Experienced in developing multilingual and user-friendly apps that improve stability, performance, and user engagement.

Professional Experience:

Lead Mobile Developer

2025 – Present

Tecnanod

- Delivered and released production-ready Android apps – ZamZam – Capital and Nod Taxi, serving as key mobility solutions in Azerbaijan, built with Kotlin, Jetpack Compose, and MVVM.
- Implemented Firebase Firestore to enable real-time data sync and push notifications, improving app engagement and user retention.
- Led the end-to-end publishing pipeline on Google Play, including D-U-N-S registration, Play Console setup, and compliance documentation, ensuring smooth and successful launches.
- Built Qusar Travel – Guide & Nature, a government-backed tourism app showcasing regional culture, using Jetpack Compose, Clean Architecture, and Hilt – designed to attract both local and international travelers.

Professional Experience:

Mobile Engineer

2024 – Present

Pioneer LLC

- Developed and released the Pioneer Market app for both Android and iOS, ensuring feature parity and consistent user experience across platforms.
- Collaborated with designers and backend developers to define requirements, align features, and deliver a cohesive product.
- Integrated OTP-based authentication, push notifications, and remote server communication for bonus card management, improving security and customer engagement.
- Optimized performance and stability through testing and debugging, resulting in a smooth cross-platform experience.
- Delivered a user-friendly, production-ready application successfully published on Google Play and distributed via p1oneer.az.

Work Experience

Android Developer

2024 – 2025

Evera LLC

- Led the development of Evera, an e-commerce mobile app for home & garden products.
 - Implemented MVVM architecture with multilingual support and Firebase integrations (Auth, Realtime DB).
 - Integrated Google Maps API, Lottie animations, and Glide for improved UI/UX.
 - Oversaw publishing: handled documentation, Play Console setup, and successful release to Google Play.
-

Work Experience

Android Developer

2023– 2024

Creative Studio

- Built “Kiraye.az” and “Vakansiya.az ” Android apps with Kotlin and Firebase.
 - Implemented Material Design UI and integrated Google Play Billing for in-app purchases.
 - Successfully published both apps to Google Play.
-

Work Experience

Junior Android Developer

2023– 2024

Rich Media

- Contributed to Android application development using Kotlin and XML.
 - Assisted in debugging, UI design, and feature integration under senior developer guidance.
-

Work Experience

Junior Android Developer

2022 – 2023

ILNOD Studio

- Developed and maintained Android apps (Earnod, Earnod2) with Kotlin and XML.
- Integrated Firebase backend and Google Play Billing for in-app purchases.
- Focused on bug fixing, performance improvements, and publishing to Google Play.
